

The Future of Drupal

What's beyond D10

Drupal 10

Where are we now?

- CKEditor 5
- Media and Layout Builder available out of the box
- Olivero as the default front-end theme
- Claro as the default administration theme
- Accessibility

If you thought opening paragraphs were amazing, wait till you begin writing blog posts with leads! They'll blow your mind. They

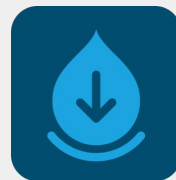

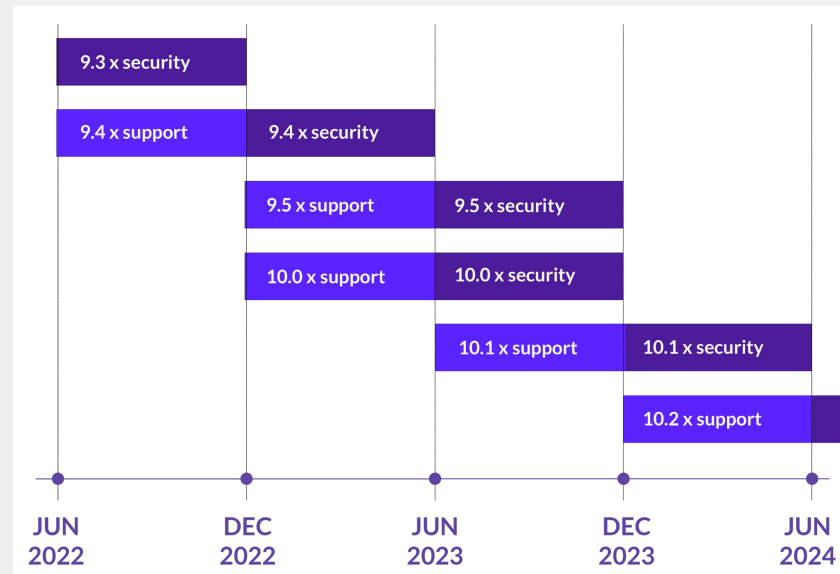

What's Coming in D11?

Drupal 11

Constant Innovation

Transitional Initiatives

- Project Browser
- Automatic Updates
- Recipes/Starter Templates

Project Browser

- Quality metrics introduced
- Understand which modules are best suited to your needs

Admin Toolbar

What is the Admin Toolbar module? The Admin Toolbar module intends to improve the default Toolbar (the administration menu at the top of your site) to transform it into a drop-down menu, providing a...

Administration

259,601 installs

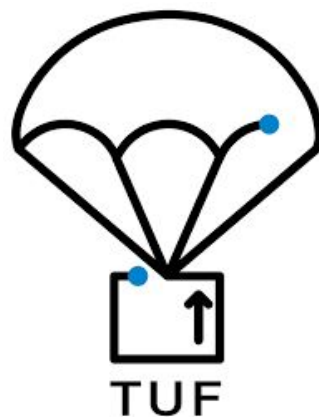

Add and Install

The screenshot shows the Drupal Project Browser interface. At the top, there's a navigation bar with links like 'Back to site', 'Manage', 'Shortcuts', and user information. Below this is a 'Filter Categories' sidebar on the left with a list of module categories like Accessibility, Administration, Commerce/Advertising, etc. The main area has a search bar with 'calendar' entered. Below the search bar, it shows '9 Results' with filters for 'Maintained' and 'Covered by a security policy'. A 'Sort by' dropdown is set to 'Active installs'. The results are displayed in a grid of three cards: 'Calendar Link' (1,750 installs), 'Calendar Systems' (1,178 installs), and 'Smart Date Calendar' (534 installs). Each card includes a brief description, a 'View Commands' button, and a 'Fields' tag.

Drupal 11

Automatic Updates

- Schedule automatic security updates
- Update patch versions and even minor versions automatically
- Save time for your engineering team so they can focus on features

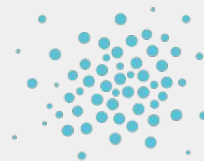

Drupal 11

Recipes Starter Templates

- Built on the previous “distributions” framework
- Mix and match packages of modules and features together
- Get a jump start on your Drupal project

When will D11 be here?

Drupal 11

Timeline

- The features of Drupal 11 are being built in Drupal 10.
- If you stay up to date with 10.1, 10.2, 10.3, etc. – you will receive powerful feature updates every 6 months.
- Drupal 11 will mark the moment when major underlying libraries receive updates, and when deprecated code is removed.
- Drupal 11 is targeted for August 2024, with a December 2024 fallback

Guidelines

New major releases only include:

1. Increasing PHP and system requirements
2. Upgrading dependencies to new major releases
3. Removing code deprecated during the previous major development cycle.

All other changes should be backwards-compatible with the final scheduled minor release of the previous major version.

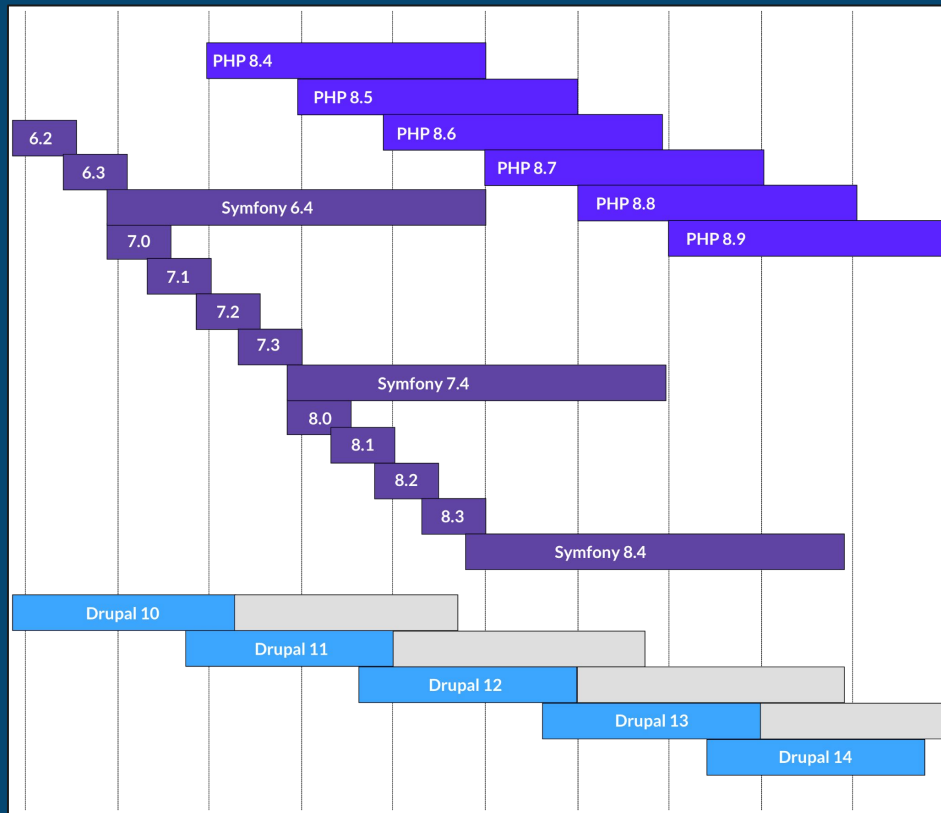

A blue-tinted photograph of a long, straight road stretching into the distance towards mountains. The road has a double white line down the center and single white lines on the sides. The landscape is arid with sparse vegetation and mountains in the background under a clear sky.

What's beyond?

Drupal 11

Looking to the Future

- Impact of generative AI
- Participation in the roadmap
- Power of the contrib space
- Digital in the physical space

Thank you.
